Y.A.M.S. WELLNESS

Website & Client Portal — Features & Functionality Guide

Prepared for: [Coach Name], Owner **Sites:** yamswellness.com (public website) · portal.yamswellness.com (client portal) **Last Updated:** June 2026

OVERVIEW

The Y.A.M.S. Wellness platform is two connected applications built for your coaching practice:

1. **The public website** — tells your story, presents your four packages, and turns visitors into Vibe Check applicants.
2. **The client portal** — a secure, login-protected space where each client's coaching journey lives (intake, session prep, progress, resources, contracts), plus a private admin dashboard where you run the entire practice.

Every application, email notification, and client account flows between them automatically — no spreadsheets, no third-party booking apps, and no monthly software subscription.

SECTION 1: THE PUBLIC WEBSITE

The public website has six pages your visitors see and use.

1.1 HOME PAGE (INDEX.HTML)

The front door to your practice. It speaks directly to your audience — high-achieving Black women ready to stop surviving and start living in alignment — and moves them toward one action: applying for a Vibe Check.

What it includes:

- **Hero** — “For the woman who has poured into everyone but herself,” with an Apply call-to-action
- **”You know this feeling” section** — names the alignment problem your coaching solves
- **Packages grid** — all four coaching paths with pricing (see 1.2)
- **Testimonials** — real client words, real shifts
- **Email opt-in** — visitors get the free 5-Day Alignment Reset guide and join your list

- **Final call-to-action** — “Ready to stop pouring from an empty cup?”
- **Mobile-friendly navigation** throughout

1.2 WORK WITH ME PAGE (WORK-WITH-ME.HTML)

Full detail on every package, including what’s included and who it’s best for:

Package	Format	Price
REVIVE	3 x 60-minute sessions	\$150
RESTORE	2 x 90-minute intensive sessions	\$350
REALIGN	6-week program, weekly sessions	\$2,000
THE YAMS METHOD	12-week signature transformation	\$3,500
Individual sessions	Single 60-minute session	\$50

All packages include client portal access. The page closes with the four-step “From application to alignment” path: Apply → Connect → Begin → Transform.

1.3 ABOUT PAGE (ABOUT.HTML)

Your story — why you built Y.A.M.S. — plus the Focus → Reflect → Refine framework explained, your approach, and your credentials.

1.4 APPLY PAGE (APPLY.HTML) — THE VIBE CHECK APPLICATION

The heart of the public site. Prospective clients complete a short application:

- Name, email, phone, city
- How they heard about Y.A.M.S.
- Which package they’re interested in (or “not sure yet”)
- What’s bringing them here right now
- What they want to be different 90 days from now

What happens on submit:

1. The application is saved to your database as a lead
2. The applicant instantly receives a branded confirmation email with a summary of what they shared
3. You receive a notification email with the full application

4. The lead appears in your admin Leads screen, ready to review

1.5 CONTACT PAGE (CONTACT.HTML)

A simple form for general inquiries, media, and partnerships. Messages are saved to your admin inbox and emailed to you.

1.6 TERMS PAGE (TERMS.HTML)

Your terms and conditions.

SECTION 2: THE CLIENT PORTAL (what your clients see)

Each client logs in with their own account and sees only their own records. Seven pages:

2.1 DASHBOARD

A personal welcome with their journey at a glance — package, upcoming focus, and quick links to everything below.

2.2 INTAKE

The intake form they complete before the first session — their story, goals, and starting point. Saved to their record so you can review it any time.

2.3 SESSION PREP

Reflection prompts clients complete before each session, so every meeting starts with intention.

2.4 PROGRESS

A running progress journal — clients log their shifts week by week, and you can add coach notes alongside.

2.5 RESOURCES

Your curated resource library — practices, readings, and tools you publish from the admin. Clients can read; only you can add.

2.6 CONTRACT

The client reviews their coaching agreement and signs it electronically, right in the portal. The signed contract is stored on their record.

2.7 CONTACT COACH

A direct message line to you between sessions. Messages land in your admin inbox and your email.

SECTION 3: THE COACH ADMIN (password-protected, coach only)

Your private back office at the portal address. Protected by coach-only authentication — no client can ever access it.

3.1 DASHBOARD

A snapshot of the practice: active clients, new leads, upcoming sessions, and recent activity.

3.2 LEADS

Every Vibe Check application in one pipeline. Filter by package, review the full application, and track status from new lead → call scheduled → enrolled.

3.3 CLIENTS

The full roster. Click any client to open their complete record — intake, session history, progress entries, contracts, and profile.

3.4 CREATE CLIENT ACCOUNTS

When an applicant becomes a client, you create their portal account directly from the admin — one click, credentials handled automatically.

3.5 CALENDAR

Your session schedule across all clients.

3.6 CONTRACTS & TEMPLATES

Write your coaching agreement once as a reusable template using merge fields:

- {{CLIENT_NAME}}
- {{PACKAGE}}
- {{DATE}}

Send a contract to any client in seconds — the fields fill themselves. Signed contracts are stored on the client's record.

3.7 FINANCIALS

A payment log tied to clients and packages, so you always know what's been paid and what's outstanding.

3.8 MESSAGES

Your inbox for client messages sent from the portal's Contact Coach page and the public contact form.

3.9 REPORTING

Summaries of leads, enrollment, and revenue across the practice.

3.10 RESOURCES

Publish and manage the shared resource library your clients see.

3.11 STATUS

A system health view confirming everything is running as expected.

SECTION 4: AUTOMATED EMAIL NOTIFICATIONS

The right email goes out automatically at every step:

When a Vibe Check application is submitted:

- The applicant receives a branded confirmation summarizing what they shared and what happens next
- You receive a notification with the full application

When a contact form message arrives:

- The sender receives an acknowledgment
- You receive the message by email (and in your admin inbox)

When you create a client account:

- The new client receives their portal welcome and login details

When you message a client from the admin:

- The client receives your message by email
-

SECTION 5: SECURITY

- Every client has their own login (Firebase Authentication)
 - Database security rules guarantee each client can read and write **only their own records**
 - The admin is locked to your account with a coach-only permission claim
 - Resources are readable by logged-in clients but writable only by you
 - Financials, leads, and templates are visible to you alone
-

SECTION 6: TECHNOLOGY & HOSTING

For reference — you don't need to manage any of this day-to-day.

- **Hosting:** Firebase Hosting (Google) — both the website and the portal
 - **Database:** Firebase Firestore — leads, clients, sessions, progress, contracts, messages, payments
 - **Authentication:** Firebase Auth with a coach-only admin claim
 - **Automated functions:** Firebase Cloud Functions — application pipeline, account creation, and all emails
 - **Email delivery:** Gmail via secure app credentials
 - **Domains:** yamswellness.com (website) · portal.yamswellness.com (portal)
-

SECTION 7: QUICK REFERENCE — YOUR ROUTINE

When a new application arrives (you'll get an email):

- ☐ Open Admin → Leads and review the application
- ☐ If it's a fit, send the Vibe Check scheduling link
- ☐ After the call, create their client account from the admin

When a new client enrolls:

- ☐ Send their contract from a template (fields fill automatically)

- ☐ Confirm they've completed intake before session one

Weekly:

- ☐ Check Session Prep entries before each session
- ☐ Add session notes and progress entries after each session
- ☐ Log payments in Financials

As needed:

- ☐ Add new items to the Resources library
- ☐ Reply to portal messages from the Messages inbox
- ☐ Review Reporting for a practice-level view

Questions? This guide describes the platform as deployed in June 2026.
